TITLE: Dichlorpromazine, chlorpromazine, chlordiazepoxide in psychiatric outpatients  
(comparative controlled study) [This paper was presented at the 7th Annual Psycho-  
pharmacological Meeting, Jesenik, 20-23 January 1965.]

SOURCE: Activitas nervosa superior, v. 7, no. 3, 1965, 300-301

TOPIC TAGS: chlorpromazine, tranquilizer, drug treatment

ABSTRACT: Study was made with neurotic patients in whom anxiety was one of the  
dominant symptoms. 94 patients completed the trial. Results showed that chlordia-  
zepoxide had less effect than the other drugs. Even placebos gave more relief to  
patients. Orig. art. has: 1 figure. [Orig. art. in Eng.] [JPRS]

"Analysis of the Dynamics of Group Psychotherapy Sessions"

Budapest, Magyar Pszichologiai Szemle, Vol 23, No 1-2, 1966, pp 146-157.

Abstract: The group psychotherapy sessions held at the authors' Institute since 1963 were analyzed and the data were presented in tables. The distribution of the approximately 100 patients involved according to symptoms was interpreted in terms of their behavior during the sessions. The various aspects of performance during the sessions were analyzed statistically. The principal functional groupings involved vivacity, group cohesion, influence of the doctor, and number of participants. 14 references, including 5 Hungarian, 3 German, and 6 Western.

HORÁNYI B. Neurol. Klin., Med. Univ., Budapest Acta morph. Acad. Sci. hung. 1957,  
7/4 (437-447) Illus. 10

Histological examination of the plexus chorioideus of a 32-year-old cow, 2 dogs aged 17 and 18 yr., and of 92 persons of various ages, 50 of them over 65 yr. Practically no sclerosis was found in the animals. Various degrees of sclerosis were found in a large number of the humans. No relationship was found between age and the extent of the sclerosis. Furthermore, there was no correlation between senile changes in other locations in the CNS and the plexus sclerosis.

"Neurological-Clinical Significance of Histological Investigations of Live Muscle"

Budapest, 1 MTA Biológiai és Orvosi Tudományok Osztályának Közleményei, Vol 13, No 4, 1962; pp 321-344.

Abstract: On the basis of author's investigations, the following practical conclusions may be drawn: 1. In the case of a muscular atrophy of uncertain diagnosis a biopsy must be performed even when the EMG is unequivocal. 2. In every case of muscular atrophy where the etiology is unclear, a careful endocrinological and electrolyte-metabolic examination must be carried out. 3. Proximal atrophy occurring between the ages of 30 and 40 should always lead one to suspect polymyositis or endocrinopathic, renal or other types of electrolyte disturbances. In such cases it is necessary to carry out careful endocrinological and electrolyte-balance examinations combined with biopsy. 4. Muscular atrophies beginning around 55 or 60 indicate the possibility of polymyositis according to the author.

"Electroencephalographic Aspects of Headaches."

Budapest, Időgyógyászati Szemle, Vol XV, No 12, Dec 62, pages 366-380.  
Hungarian

Abstract: [Authors' summary modified] The authors present the results of EEG studies on 214 clinically observed headache cases excluding those which accompany hypertonic, post-traumatic and organic neurological disorders or involve loss of consciousness. Their study is divided into three groups, migraine, vascular headaches and neurotic headaches. A detailed discussion of the electroencephalographic results is given. The authors do not feel that antiepileptic drugs are useful in the treatment of headaches which show dysrhythmia.

"The Pathophysiology of Pain."

Budapest, Orvosi Hetilap, Vol 104, No 28, 14 July 1963, pages 1297-1301.

Abstract: The author presents a detailed study on pain. Its biological significance is discussed. A historical survey is made on the theories concerning pain. Pain stimuli and the reaction sequence in response to them are described. The parts of the brain thought to take part in the psychic perception of pain are discussed. Referred pain is also treated. Attention is called to individual variations and the decrease in pain perception during old age. No references.

"The Physiology and Pathophysiology of the Cortico-Spino-Muscular Tract."

Budapest, Orvosi Hetilap, Vol 104, No 33, 18 Aug 1963, pages 1539-1542.

Abstract: Based on a thorough survey of the literature and 30 years of study, the author discusses the mechanism of motion and the anatomical and physiological structures connected with it. The central impulse for motion is defined. The cortico-spinal system and its origin are discussed. The topographical orientation of the motor neuron cells and their function as well as the gamma cells are described in detail. Very extensive studies have been conducted on muscle biopsy samples of patients whose diseases involved the skeletal muscles. The results of these studies are reported. 3 Hungarian, 7 Western references.

TITLE: Meningeoma in children which developed as a result of x ray irradiation

SOURCE: Magyar Radiologia, no. 1, 1965, 1-7

TOPIC TAGS: radiology, x ray effect, x ray irradiation, radiation biologic effect, nervous system disease, neurology, tumor, pediatrics, radiotherapy, infant disease, pathology

ABSTRACT: A 5 year old girl received x ray treatment with 5 x 400 r for epilation because of microsporiosis. At the site of the irradiation, a meningeoma of moderate malignancy, the size of a child's palm, developed. The case furnishes proof that irradiation of the skull can cause not only necrosis but the development of nerve tissue tumors as well, especially in children. Orig. art. has: 7 figures. [JPRS]

"Sarcoidosis of the Skeletal Musculature"

Budapest, Ideggyógyászati Szemle, Vol 20, No 2, Feb 1967, pp 60-66.

Abstract: Two cases of the sarcoidosis of the skeletal musculature were described and discussed. Both were verified by means of muscle biopsy. One was the so-called myopathic form; the second, the asymptomatic form (a partial phenomenon of general sarcoidosis). The authors discussed the general clinical, laboratory, electromyographic, and pathologic aspects of muscular sarcoidosis. 14 references, including 2 German, 6 Hungarian, and 6 Western.
